This life has taken a toll for the worse
Everything's an upward battle
To live now is harder with nothing to lose
Two paths ahead, which one do I choose?
Wheres the life that was promised to us?
Still can't accept defeat
Going nowhere with no one to trust
I want the life that was taken from me
Wheres the life that was promised to us?
Hey hey hey hey
Wheres the life that was promised to us?
Hey hey hey hey
Going nowhere with no one to trust
No one!
I was born with a black cloud over my head
Spending nights wishing I was dead
No one!
From birth to present day
Nothings gone the right way
I was born with a black cloud over my head
Spending nights wishing I was dead
Things are moving in a slower pace
The whole world just spat on my face
Life Denied!
This life has taken a toll for the worse
Everything's an upward battle
To live now is harder with nothing to lose
Two paths ahead, which one do I choose?
