"A World Of Our Own"

Visit "[A World Of Our Own](#)" on [MotoLyrics.com](#)

When the world just keeps on bringing you down
You can call my name and I'll be around
I will try my best to never leave you alone

When we're here inside with nothing to do
Baby, I feel fine just being with you
I will tell them all to please just leave us alone
You and I, we live inside the world of our own

Just a lonely girl that nobody knew
Since the day we met, it's just me and you
You and I, we live inside the world of our own

People come and go, they rise and they fall
And the lives they lead mean nothing at all
You and I, we live inside the world of our own
You and I, we live inside the world of our own
To the end of time inside the world of our own

Girl, only you will survive
Won't they back out and leave us alone
We're just two people who live
With a personal view of our own

When the world just keeps on dragging you down
You can call my name and I'll be around
You and I, we live inside the world of our own

When we're here inside with nothing to do
Baby, I feel fine just being with you
To the end of time inside the world of our own
You and I will live inside the world of our own
You and I will live inside the world of our own
