My girl, she's extraordinary  
My girl, she's different from the rest  
She is truth combined with fiction, a lovely  
contradiction  
But you'll only see the part of her she wants you to see

Yes, you'd understand if you knew her like I do  
I just do what I can to keep up on her points of view  
And laugh to myself when it's over my head  
She's got a way all her own

Sometimes she baffles and confounds me  
But I'm fine when she wraps her arms around me  
When I finally figured out, I'll never figure her out  
That's when I begin to understand just what she's all  
about

Yes, you'd understand if you knew her like I do  
I just do what I can to keep up on her points of view  
And laugh to myself when it's over my head  
'Cause she's got a way all her own  
Yes, she's got a way all her own

She smiles and the questions disappear  
She cries and only God knows why she's here

Yes, you'd understand if they knew her like I do  
I just do what I can to keep up on her points of view  
And laugh to myself when it's over my head  
'Cause she's got a way all her own  
Yes, she's got a way all her own  
She's got a way all her own
