How can I turn it around
How can I turn it around with you?
How can I turn it around
How can I turn it around for you?

And the love lost will all be found
If your heart hears the sound
It's everywhere
If you're aware

I'll turn it around
How can I turn it around with you?
How can I turn it around for you?

How many years will it take
'Til we learn from our mistakes?
When all our races are run
Will we still be chasing the sun?

And I never meant to hurt your feelings
All I want is to be by your side
How can I turn it around?
How can I turn it around?

How many times have we tried
To hide what we're feeling inside?
All our tomorrows will be
A new dawn if we only see

That the love lost will all be found
When your heart hears the sound
It's everywhere
If you're aware

How can I turn it around?
How can I turn it around with you?
How can I turn it around?
How can I turn it around for you?
