## "Starlight"

Visit "[Starlight](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Don't have no time to follow rainbows  
There never was a pot of gold  
And you brought the magic  
With your love and sweet simplicity  
It's so easy when you find the key to see

The circles turned and you are with me  
You give me strength and faith to be  
And the stars aligned and brings us into perfect  
harmony  
You're a guiding light that shines it's light on me

[Chorus]  
You're like starlight, you're like moonlight  
You're my never-ending breath of mystic light  
You're like starlight, you're like moonlight  
My guiding star of the night  
My guiding star of the night  
My guiding star of the night  
My guiding star of the night

Light forces never to be challenged  
There always be a mystery  
Like the sweet vibrations running through my veins  
When you kissed me  
Justified beneath the powers you can't see

You call me, baby, I will follow  
I'll trust in you, believe in me  
And the stars aligned and brings us into perfect  
harmony  
You're the guiding light that shines it's light on me

[Chorus]

[Interlude]

[Chorus 2x]
