Don't know what I'll be wearing, only that I wanna score  
and get it on  
I'm going to bring a whole lot of Ribavirin and  
Interferon  
You're invited if you're a hype, if you wanna go just  
follow me  
You've just got to know your genotype, so let's get you  
a biopsy  
Rebatron party tonite  
48 weeks gonna feel not right  
Rebatron party tonite  
If you have Hepatitis C, this soiree has got it all  
Come on in it's the place to be, but they won't let you in  
with alcohol  
You've got to kick the smack to fully dig the  
masochistic addiction  
Everybody here at this swingin' shack has a legitimate  
doctor's prescription  
First take a look at your viral load, yeah baby now  
you're totally groovin'  
Shoot some of this and try to put it on hold, now let's  
monitor your Bilurubin  
Now you've got it, now you're styling  
The party keeps going on day after day  
Kick me down some of that Ribavirin  
And check my recombinant RNA  
Set aside 18 months please, stop taking herbal  
remedies  
Say goodbye to the life of crime, up the dose of the  
Heptazyme  
[Alternate verse]  
Pegasus, Ribozyme, Alpha, Peg-intron  
Is what we're hopped up on  
From the dead of night to the break of dawn  
We're gonna slam it all up 'til the shit's all gone
