I've never seen you rain
I only get your thunder
I always take the blame
For a spell you're under

And I, I will only lose
Following your moods
But love is not a one-way mirror
If that's the way it is
Let's seal it with a kiss
There's nothing wrong with me or you
But I know we can never be one until we are two

I try to ease your mind
By falling just follow
With dominos in line
Falling too tomorrow

But I, I can only see
I wider shade of me
By looking in a one-way mirror
If that's the way it is
Let's seal it with a kiss
There's nothing wrong with me or you
But I know we can never be one until we are two

Whenever you may rain
I won't run for cover
We don't have to be the same
To be there for each other

But I try in every way
To make you feel okay
By looking in a one-way mirror
There's no one to blame
But something's gotta change
There's nothing wrong with me or you
But I know we can never be one until we are two
I know we can never be one until we are two
