

## And One "Second Voice"

Visit "[Second Voice](#)" on MotoLyrics.com

When you close your eyes  
There is no time to understand.  
No time to realize  
You feel the fire as it burns desire...

You hear a second voice  
It's speaking to you tonight  
You hear a second voice It's speaking to you tonight

Deep in the night  
You're walking through the rain  
You feel the raindrops beating on your head  
in times like these you think about everything  
but we know, they don't understand

You hear a second voice  
It's speaking to you tonight  
You hear a second voice It's speaking to you tonight

The second voice follows me day by day  
The second voice is everytime so deep inside  
The second voice observes me through my life  
The second voice is everytime so deep inside
