### CHORUS

Girl comes home and checks her phone  
She fools herself that she's not alone  
But everybody wants to be like you  
And it all boils down and all this ends  
You turn around and you got no friends  
But everybody wants to be like you

I would really hate to be her  
Think they love her when they see her  
When she's gone she just don't know  
What they say  
She inherited the drama  
It was passed down from her mama  
And her daddy he would only drink wine

Only is she came around  
But she's slowly goin' down

### CHORUS

She looked a whole lot older  
Yet nobody ever told her  
You would never know  
That she was sixteen  
And as far as I remember  
She was standing on the corner  
Just the type that loved  
To be on the scene

Only if she came around  
But she's slowly goin' down

### CHORUS \*2 (ad lib)

Girl comes home and checks her phone  
She fools herself that she's not alone  
But everybody wants to be like you
