Who told you to be so cruel
Who told you what to do
Who taught you to act that way
Who taught you to disagree

Who taught you to act that way
Who taught you to do what you do
Who taught you to despise
Who told you that you were right

Who told you to be so cruel
Who told you what to do
Who taught you to act that way
Who taught you to disagree
Who told you to act that way
Who told you to destroy
Who told you to despise
Who told you that you were right
