"One More Story"

Visit "[One More Story](#)" on MotoLyrics.com

Seen more than I'll ever witness
Forgotten more than I will ever know
You taught me all about this game called life
So far every word you said to me was right

The wrinkles on your face
Tells more than (***)
The place where I wanna be right now
Tell me one more story
No, you told me one too many times
Before I have to hear this one more
(***)

Seen more than I'll ever witness
Forgotten more than I will ever know
You taught me all about this game called life
So far every word you said to me was right

(***)
Your life is haunting me

I see your laugh in your eyes
I see you look in the skies
For someone who's fought through everything
(***)
You don't remember my name
I can now see your (***)
(***) you had around my (***)

Seen more than I'll ever witness
Forgotten more than I will ever know
You taught me all about this game called life
So far every word you said to me was right

(***)
Your life is haunting me Your life is haunting me
