Tomorrow comes like yesterday  
And you and I wont fade away  
We'll last forever (we'll last forever)  
We've come this far against the odds  
We've stopped and fought like cats and dogs  
Think we'll be all right (yeah we'll be all right)

[Chorus]

You and me (oh hell ya)  
We've been through everything (oh hell ya)  
We've come to far to throw it all away  
Nothing or no one could stand in the way  
Never gonna let you down again

We've felt the pain along the way  
At every turn in everyday  
We'll last forever (we'll last forever)  
We walk with blistes on our feet  
And every step we kicked and screamed  
Think we'll be alright (yeah we'll be alright)

[Chorus]

You and me (oh hell ya)  
We can do anything (oh hell ya)  
We've come to far to throw it all away  
Nothing or no one could stand in the way  
Never gonna let you down again

Tomorrow comes like yesterday  
And you and I wont fade away  
We'll last forever (we'll last forever)  
We've felt the pain along the way  
At every turn in everyday  
Think we'll be alright (yeah we'll be alright)

We've come to far to throw it all away  
Nothing or no one could stand in the way  
Never gonna let you down again....again....again...again
