"I Was Wrong"

You're floating in my atmosphere
I can't breathe
Took me so long to notice what was hanging over me
My friends say you're a castastrophe that I can't see
They've never been wrong before

[Chorus]
I was wrong to believe
That you were better than nothing
Better than nothing
I was wrong to believe
That you were better than nothing
Better than nothing

Your car crash habit just about killed me
I let you drive me round and round
Until I fell asleep
Out long expired memories remind me
Of What it was like before

[Chorus]
I was wrong to believe
That you were better than nothing
Better than nothing
I was wrong to believe
That you were better than nothing
Better than nothing

What I want from you
Is something more than
You can give
Say good bye
What I want from you
Is something more than
You can give
Say good bye

[Chorus 2x]
I was wrong to believe
That you were better than nothing
Better than nothing
I was wrong to believe

That you were better than nothing
Better than nothing

I was wrong to believe
That you were better than nothing
Better than nothing
I was wrong to believe
That you were better than nothing
Better than nothing

I was wrong to believe
That you were better than nothing
Better than nothing at all
