Like a liar, like a thief
Like a worn torn child who needs relief
Im reeling hazy, force from the blow
I just cant find the words to let you go
I got no words, I got no words for you
I got no words, I got no words its true

Call the system, that aint right
I don't play to win cause, I don't wanna fight

Im reeling hazy force from the blow
I just cant find the words to let you know
I got no words, I got no words for you
I got no words, I got no words its true

I made you suffer, I let you fall alone
Was undecided, keep creeping oh for more
I made you suffer I let you fall alone
Was undecided, but I was wrong

I made you suffer, I let you fall alone
Was undecided, keep creeping oh for more
I made you suffer I let you fall alone
Was undecided, but I was wrong

I made you suffer, I made your skin crawl
I know a place where the old can die alone
I made you suffer I made your skin crawl
Oh no

I Got No Words
