"No Turning Back"

The atmosphere is breaking up
Sunlight starts to burn my skin
Losing weight but I swell
Wish I'd die and leave this hell
Cannot stop no turning back
Rays that burn my front and back
Our solar death that we deserve
For being ignorant with our world

[CHORUS]

We will die, we will fry
We never learn, so now we burn
The time has come to start again
But first we all must see the end
By hand of god or man
To oblivion we descend
I think that this is understood
Wouldn't stop it if I could
Time for the human race to die
And give this world a chance to thrive

[CHORUS]
