somewhere else its still yesterday  
in a little while it'll be right now  
continuum of both time and space  
a disruption impossible  
go back a year now and where are we  
12 months away from where we're going to be  
procrastination's not happening  
so why put off what you can do in a minute

maybe it's tomorrow right now  
1159

after it changes before your eyes  
we're all metamorphosised  
it's automatic baby  
you're living in the now  
and as the cycle runs its course  
just like it's done a thousand times before  
what comes to pass must fall away  
tomorrow seems like it was only yesterday

maybe it's tomorrow right now  
1159  
i don't know what's to follow  
i'm in the now  
1159
