

Cruel Sea, The "Daylight"

Visit "[Daylight](#)" on MotoLyrics.com

Daylight descends from my life
And goes on to awaken your world
Its the same sun, the one thing that connects
This boy to you, girl
And I'm still so far away
And you're still no closer today
And I'm not gonna take it
Don't think I can take it anymore
Darkness descends and envelopes
Us all in a blanket of black
And the planets revolve and the daylight dissolves
And we see them move forth and back
And I'm still so far away
And you're still no closer today
And I'm not gonna take it
Don't think I can take it anymore
