Featuring Imam THUG]

(Imam THUG)

Yeah... that real shit...

Imam Thug burstin' out the coccoon like that

Apples just droppin' from the tree

That's a'ight though...

Yo yo yo yo yo

I'll be the last man standing in the middle of a major
war

B.C. cavemen and dinosaurs

Laws were unlike mine and yours

They got some type of shit they put up in your fuckin'
drawers

Try to feel 'em out figure out the major flaws

Thinkin' I could catch one in the back of Mecca halls

See my face posted in about a hundred stores

Missing - last seen at the ?lab? convention

Time-warp coincides with the mic cord

Savage beast - each trait meet

(Tragedy Khadafi)

We('re) like Neanderthals trapped in ice to be precise

Microchip in your body like Blood of Christ

I fast forty days and pray for forty nights

Return to the essence of Life for all life

Conceived in the Earth and placed upon walls

Resting in the pyramid, wake when night falls

Bless me with the gat and clips to be injected

To the next life it changed my whole perspective

Slaughtering my children - Gentiles and Romans

I'm holding - swords and gats for evil omens

Mark of the beast imprint were being sewed in

To the last day they say - world exploding

1999 ?null refined?

Internet web control your whole mind

My third eye shine insight to lead the blind

A hundred and forty-four thousand more crimes

A fugitive who's wanted by feds of all kinds

For waking up thugs and showing them true signs

True signs(true signs)

For the blind

Two-Five, forever shine

Been on this planet for 25 years but still bleeding

Internally - trapped in Hell but still breathing

Caught up in the Empire State - Garden of Eden

Millennia surround my life for wrong reasons

I didn't ask to be here, god, see I was placed

Amongst Canaanites with six carved in face

Holding all the gods up north behind gates

Amorites ruling the world and all states

True lies coming from tongues of true snakes

La ilaha la ila Allah

Gomar Oz Dubar

We shine like North Star

CNN - Two-Five forever

(ad libs)
