There is nothing wrong
With the pain that you bring with your love
There is nothing wrong
When you don't make me feel like I'm better one

And you say, that tonight no one can reach you
You say there's nothing they can teach you
You wanna be there
Somewhere else
Any place
'Cause here you cannot stay

There is nothing wrong
Just tell me you're leaving, I won't say a word

Anything you've ever played
I know you always gonna win
Don't wanna take part in it anymore
I'm free

I could take your face out of the frame
But I guess it won't make me forget
Today I'm scared of what may come
And I don't want to know it now
We'll write this book and when we're done
Should we go on if we've got so far
We've got no bridges left to burn
And no one else left to turn to

There is nothing wrong
When you give something more and the pain is gone
There is nothing wrong
If you tell me the rules when the game is on

Everything I try to give you
didn't seem enough to keep you

So look at me, caught the floor
The door don't have much to say I know

There is nothing wrong
Let's make it clear one sin for all

I could take your face out of the frame
But I guess it won't make me forget
Today I'm scared of what may come
And I don't want to know it now
We'll write this book and when we're done
Should we go on if we've got so far
We've got no bridges left to burn
And no one else left to turn to

I could take your face out of the frame
But I guess it won't make me forget
Today I'm scared of what may come
And I don't want to know it now

There is something wrong...
