Understanding what it is to cause infection  
Undermines the very satisfaction of my affection  
To see if there's nothing left and will never ever  
surface again

If you ask someone to change fresh like the day break  
hits at dawn  
And if you wait for me and see there's nothing left to  
you and me  
But our "could have been's..."

You know it's gone  
You know it's gone, it's gone  
Gone away

Bloodshed to bloodshed  
A tarnished romance  
Each day things get a little bit better  
Better without you

You know it's gone  
You know it's gone, it's gone  
Gone away  
In every corner of my eye the walls are caving in  
tonight, tonight  
Another day, another token etched in my skin for our  
love  
Our dead hopes

You know it's gone  
You know it's gone, it's gone  
Gone away

And don't you ever take me for granted...  
That means you  
Yes that means you
