Come on

Yeah, NYC, the place to be

Look at all the rock heads like you and me

Push against the pavement, take it to the street

Sick of all the hype now riding on the beat, yeah

Come on

Don't let us down, don't let us down

They're chasing us around all over town

Me watching power, illuminate the night

Pixilated fury, I'm blinded watch as I

Blank generation, they got us

Knowing what the game is, never steal from us

Come on

Don't let us down, don't let us down

They're chasing us around all over town

Don't let us down, don't let us down

They're chasing us around all over town, yeah

Lead the way, man, drop your wall

Lead the way, man, drop your wall

Savage scene, you gotta chase the dream

Stand tall but you gotta root it all

Scarred for life, you gotta let it bleed

Burn the scene

Lead the way, man, drop your wall

Lead the way, man, drop your wall

Come together, come on

Don't let us down, don't let us down

Oh, come on

They're chasing us around all over town, oh

Don't let us down, don't let us down

Oh no

They're chasing us around all over town

Oh no, oh no, oh no
