"One by one they drop", you said
Left us two on a ride stopped dead
It's monkeys on the track
All fell out of their tree
"Lost their tails", I said
"In the deep dark sea"

So take me on the ice and push me around
And every time I fall, I kiss the ground
You skate on by without a sound
Yeah, I'm in love with you cold
Any warmer and I drown

Whatever you want
Whatever you need
Oh, anything at all
I'm only here to please you

In any way I can
There's really nothing in the world I won't do
To get a New York, Disney smile from you

Ow, you're so beautiful it hurts
Ow, the most beautiful girl I ever
Ow, too beautiful for words
Now please, inside beside me
And let's take on the world

"One by one they drop", you said
Left us two on a ride stopped dead
It's hard to be sure
But I swear they're whales
Swimming down the line
Spitting monkey tails

So drag me on the floor and get me to twirl
And every twist around, I buss you first
You spin right through a perfect blur
Yeah, I'm in love with you quick
Any slower and I burst

Whatever you want
Whatever you need
Yeah, anything at all
I'm only here to please you

In any way I can
There's really nothing I won't do
To get a New York Disney smile from you

Ow, you're so beautiful it hurts
Ow, the most beautiful girl I ever
Ow, too beautiful for words
Now please, inside beside me
And let's take on the world

"One by one they drop", you said
Left us two on a ride stopped dead
It's vultures on the rail
And they're packed down tight
"Best get close", I said
"This could take all night"
