Cover the distance, Love in between us  
When I am cold and afraid  
You are the secret spoken in silence  
Keeping the vow You have made  
You Hold me through sparks and shadows  
You sing me awake  
When night fails and my thoughts wonder  
You stay I love the way  
Carry the message deep in the hollow  
Hide it away underground  
There is a weary confidence fading  
When it is lost, I am found  
The way You keep on tearing down these walls  
And bringing near the vary far  
The way You keep this gentle  
But insistent revolution in my heart  
I love the way You are  
You are the only truth in existence  
Why would I reach for more  
You are my future, here in my present  
All that has gone before  
I love the way  
Sparks and shadows
