The reasons are adding up  
And I can't forget what I don't regret  
And I met you in front of the jury  
I lied, lied

So kill the lights and strike a match  
And strike a pose you like oh so nice on camera  
Here's another late night last request  
So clap you hands and crack a smile it's over

The trigger is trembling beneath my fingertips  
Beneath my mind  
And I met you in front of the jury  
I lied, lied

So kill the lights and strike a match  
And strike a pose you like oh so nice on camera  
Here's another late night last request  
So clap you hands and crack a smile it's over

We all came crashing down

So kill the lights and strike a match  
And strike a pose you like oh so nice on camera  
Here's another late night last request  
So clap you hands and crack a smile it's over
