Nanotech economy  
Micro-tuning frequencies  
Radio perception  
A miracle we have found  
Never weak and never ill  
All you do is take the pill  
Happiness in dataseed  
Never mind you're gagged and bound

In genetic heartbeat  
Inheriting philosophies  
Passing to our children  
A body that we've refined  
Inorganic insides  
Laboratory natural  
In a second overthrown  
Evolution of design

Suspect  
Magnetic  
Life defined in microbit  
Suddenly we're stranded  
In a dream without an end  
As cities build within us  
Architect biology  
Germinate the culture stem  
We made the plague  
We can't defend

And it grows, and it grows, and it grows  
Grows, and it grows, and it grows  
And it grows, and it grows, and it grows, taking over  
And it grows, and it grows, taking over  
And it grows, and it grows, taking over  
And it grows, and it grows, taking over  
Taking over  
Taking over  
Taking over
