Been bent for days
Siphon to hold me alive
I turned myself around
To what I once despised

I've been in future
And days of memory
I've seen the nothing man
And taught him to believe

And I built the enemy
I built a tower to heaven
And I built the end of me
I built a tower to heaven
Heaven (x12)
I built a tower to heaven

Panic ready now
Nightmare indiscretion
A bitter self revealed
By angels of perception

I found a savior
Naive hallucination
Standing at the water's edge
I prayed for condemnation

And I built the enemy
I built a tower to heaven
And I built the end of me
I built a tower to heaven (x3)
Heaven (x12)
I built a tower to heaven
