"Signal"

Visit "[Signal](#)" on MotoLyrics.com

What is the significance,
In playing the part?
A smiling temperament,
A sour tongue
You will see behind the shadows,
They poison my eyes.
Something more than weeping angels,
Burn into my mind.

I will protect you
I will protect you
I will protect you
I will protect you

Sinking on the way to us
Border to a part without a title

There's a part of me,
In a part of you,
In a little change,
In a part of you
There's a part of me,
In a part of you,
In a little change,
In a part of you

I will protect you
I will protect you
Someone's gotta keep you alive
I will protect you
I will protect you
Someone's gotta keep you alive
I will protect you
I will protect you
Someone's gotta keep you alive
I will protect you
I will protect you

Won't let go
But I needed change from you
Close this hole

But I needed change
But I needed change

There's a part of me,
In a part of you,
In a little chain,
In a part of you
There's a part of me,
In a part of you,
In a little chain,
In a part of you

I will protect you
I will protect you
Someone's gotta keep you alive
I will protect you
I will protect you
Someone's gotta keep you alive
I will protect you
I will protect you
Someone's gotta keep you alive
I will protect you
I will protect you

Won't let go
But I needed change from you
Close this hole
But I needed change
But I needed change
