Wanna reach a star
Wanna feel alive
Gonna wait for you just right here
After dark

I'm tellin you what I
What I want tonight
I need your la-la-la-love
Push your lips to mine
And give it, and give it, and give it, and give it

Come on and give it to me
Give it to me and let the fun start

The fun starts, right here and right now
Wanna get started
From now on I'm gonna go on
The way i like it
All the boys and the girls from the back to the front
Come, move your body from dusk till down
Gonna get started
Gonna get started

You're not the one for me
But I need a change
Should I be ashemed
'Cos I let you watch me play

Come on and give it to me
(Give it to Rami-Rami)
Give it to me and let the fun start

The fun starts, right here and right now
Wanna get started
From now on I'm gonna go on
The way I like it

All the boys and the girls from the back to the front
Come, move your body from dusk till dawn
Gonna get started
Gonna get started

And when the morning comes
Daylight will see us
Will I still feel this way

And there is only one
One thing I'm sure of
I'll never be the same
(Never be the same)

The fun starts, right here and right now
Wanna get started
(The fun starts)
From now on I'm gonna go on
The way I like it

The fun starts, right here and right now
Wanna get started
From now on I'm gonna go on
The way I like it
Gonna get started

The fun starts, right here and right now
Wanna get started
From now on I'm gonna go on
The way I like it
