Visit "[What I Did Right](#)" on [MotoLyrics.com](http://MotoLyrics.com)

I have my heroes, but no one knows their names  
They never asked for recognition, they never wanted  
fame  
My granddad fought the second world war when he  
was just eighteen  
He spent four months as a prisoner to give me the  
American dream

In my eyes he's everything, all I hope to be  
And I won't forget that day he said he was proud of me

So I'll take that one day and figure out what I did right  
I'll do it the same way for the rest of my life  
Yeah, I'll take that one day and figure out what I did  
right  
I'll do it the same way for the rest of my life  
What I did right

I have my good friends, they have a place inside my  
heart  
But my best friend, well, she holds the biggest part  
She finds the good in me, she knows just what it takes  
And she loves the man in me through all of my  
mistakes

In my eyes she's everything, everything to me  
And I won't forget that day she said, "You're all I need,  
you're all I need"

So I'll take that one day and figure out what I did right  
I'll do it the same way for the rest of my life  
Yeah, I'll take that one day and figure out what I did  
right  
I'll do it the same way for the rest of my life

And I hold my newborn baby  
To give her comfort while she cries  
In this moment I feel helpless  
'Til she looks into my eyes, her tears subside

I'll take this one day and figure out what I did right  
I'll do it the same way for the rest of my life

Yeah, I'll take this one day and figure out what I did  
right  
I'll do it the same way for the rest of my life

I'll take this one day and figure out what I did right  
I'll do it the same way for the rest of my life  
I'll take this one day and figure out what I did right  
And I'll do it the same way for the rest of my life

I'll take this one day and figure out what I did right  
I'll do it the same way for the rest of my life  
I'll take this one day and figure out what I did right  
I'll do it the same way for the rest of my life
