I used to be a really sensible guy  
I had a plan, I was in control  
Then love came and changed my mind  
Not to mention my heart, not to mention my soul

When you're dealin' with a thing like love  
You're dealin' with unseen forces  
Just when you think that you're safe enough  
You get carried away by wild, wild horses

When it's right  
Nobody has to tell you, you just know  
When it's right  
When it's right in front of you, just let go  
Her heart will never have to think twice  
When it's right

You wanna know how true love feels  
You wanna be a big romancer  
You wanna know if your love is real  
Well, if you have to ask, then there's your answer

When it's right  
Nobody has to tell you, you just know  
When it's right  
When it's right in front of you, just let go  
Her heart will never have to think twice  
When it's right

There's somebody for everybody, I believe it's true  
When you see the signals and you feel the heartbeats  
You know what to say and do

When it's right  
Nobody has to tell you, you just know  
When it's right  
When it's right in front of you, just let go  
Her heart will never have to think twice  
When it's right  
When it's right
