That first lightning bug you caught  
That first shootin' star you saw  
That first bobber you watched go under  
That first ball over the fence  
That first rock that finally skipped  
That first stray dog you saved from hunger

From that first mile high shoulder ride  
To that first car you got to drive  
To that first girl who drove you crazy  
That first date cruising the strip  
To that first nervous goodnight kiss  
No, there's nothing like the first time

God I'd really love a second time around  
Yeah I'd really love to get a second time around

That first college campus dorm  
That first marching band uniform  
That first anti-war campaign  
From that first hippie hair you had  
To that first alcohol regret  
To that wild girl you fell in love with  
That you're still in love with

God I'd really love a second time around  
Yeah I'd really love to get a second time around

To that first new car and that first real job  
That first big night in that small apartment  
Look at you at last you're all grown up  
Just like the rest of us

God I'd really love a second time around  
Yeah I'd really love to get a second time around

To that first lightning bug I caught  
And that first shooting star I saw
