Had a thought that consumed a good for bad  
I can reckon I can never beat the wheel  
There's a white tap stealing a nightmare  
Shadows laughing and making deals

Let your hair hang down for this moment  
And they try to make it disappear  
If you take away this underground dream

Guns are education  
The answer's larger than the Hollywood sign  
If your souls can see the writing  
On the burning wall of eternity  
The bastion's a penitentiary  
Reaction will pull broken hearts through

We can't take away this underground dream  
We can't take away this underground dream  
We can't take away this underground dream  
We can't take away this underground dream
