You have a job but you can't afford the rent
Why is life always just dollars and cents?
If you can't get a job, you can't get a home
Vicious cycle spawns and turns your soul to bone

Kill, kill, die, die, death, death, suicide
Why do you think those rates are so high?
Do you think it's just a coincidence that the black male
Is the highest statistic trapped on welfare

Landlord system, life for rent
Capitalism doesn't make any sense
Don't join the system, it's suicide!
Coincidence or consequence, YOU DECIDE!

WELFARE IS WARFARE
