Remember These Moments
D'Sound

I remember that crooked smile
I remember that glow in your eyes
I remember these moments baby with you

Kind of beauty you've fallen to
Kind of thought makes it painfully true
I remember these moments baby with you

Do you still see me reach for you
The way you used to care
Do you still think I should be baby with you

I remember the warning signs
I remember I paid them no mind
Coz I wanted these moments baby with you

When it rained thought I didn't cry
When I left without saying goodbye
I remember these moments baby with you

Do you still see me reach for you
The way you used to care
Do you still think I should be baby with you

reach for you
missing you
secretly recalling what has been
I don't want to remember

do you still see me reach for you
the way you used to care
Do you still think I should be baby with you
