Watch your step there are holes in your trail, you must
make it past those fences you must make it 'til the end.

All light is gone, you must fight in the dark. There is no
one here to help you there is no one here at all.

Don't pray for me, I'll pray for you
(If you fall now)
Get on your feet, keep going fool
(I won't save you)
The hour is dark, the bottom is reached
(If you fail now)
Light will prevail, you've got to believe
(I won't help you)
So get off your knees and search for you path
(I can not help you)
A new day will come, just wait and see

CHORUS:

The road is long my friend stick with it 'til the end, I'll
lead you on your way.
Keep faith and keep your strength don't loose it on your
way, one day you'll find your place

Don't pray for me I'll pray for you.
Don't just give in, don't let them win
So stay in you seat, light will prevail
Your sun will rise, just way and see
