There are roads that can take you to places that you've  
never been  
There are people - when you meet them it's  
like they have lived inside your skin  
There are souls you connect with so strong  
A bond that's so deep and so true  
And that's the way I feel about you  
There are times like a magnet you're drawn into  
somebody's life  
You' don't know what you're doing or why you are there  
But you know it's right  
There's a sense that the piece that was missing  
Has suddenly come into view  
That's the way I feel about you  
That's the way I feel about you  
I believe in this world there is nothing that happens by  
chance, no  
There's a reason that at just this particular moment you  
came  
Into my hands  
Like a gift that you never expected  
But you'll treasure your whole life trough  
That's the way I feel about you  
That's the way I feel about you  
Like a gift that you never expected  
But you'll treasure your whole life trough  
That's the way I feel about, that's the way I feel about  
That's the way I feel about you
