Meet me on a rooftop, that's where I'm gonna be  
This party is so old fashioned  
Nothing is here for me

Meet me on a rooftop, I'll bring the radio  
We can kick our shoes off and dance really slowly  
Drink a little moonshine, have fun in clover time

I've been watching you through a fascinating prism  
Moving in and out of rhythm  
Climb the fire escape with me  
We can spin the world around from a first class seat

Meet me on a rooftop  
Ooh, take a cab to the west side  
Don't you worry about being so high up  
Just lie beneath the city sky  
See Ms. Liberty shine, shine

I've been watching you through a fascinating prism  
Moving in and out of rhythm  
Climb the fire escape with me  
We can spin the world around from a first class seat

You bring the candles  
And I'll bring the Arnica oil  
I'll massage your mind until your spine uncoils

You're enticing me with a scintillating schism  
Dreaming in and out of living  
Climb in my sleeping bag with me  
You can spin my head around  
Until the birds come tweet, tweet, tweet
