"The Unearthly"

Visit ["The Unearthly"](#) on MotoLyrics.com

I am sinking into caverns of my mind
Dark abyss has opened
Into breathless midnight
I lose identity

Subterranean descent into ultra conscious non existence

Abstractions are elusive, reality confining
Illusions are redefining
As I approach my genetic core
As I approach the unearthly

World of grotesque images
Abrasive complexities threaten
Symbolic metaphors approach
Thoughts devour thoughts

Through my being unexplored
Times ceases continuity
Shroud of weightless life
Plunging into depths unknown

The unearthly - Isolated within

Sub atomic reasoning
Creatures uncertain distances
Between reality and consciousness

Temporal existence disintegrates into micro molecular infinity
Representations of ideas cloud eternal skies beyond the minds eye

Thoughts devour, thoughts devour, thoughts devour...
