Morning came today without the sun
Clouds were drumming on the land
The rain was singing out her thunderous song
I was trying to understand
Wondering to myself about the darkness in the sky
How many times I've feared
But if I could feel the joy of a tree
I'd share in the rainbow's glee
Chorus:
I'll see the good things in everything around me
The happiness and beauty of it all
So many good things if everyone could find some
Look and try to see within your heart
All good things

Darkness fell tonight without a sound
Moonlight quietly filled the air
Shadows dancing in the trees and on the ground
Sometimes night can make you scared
Trying not to be afraid of things I cannot see
All the times that I have feared
But if I could sing the song of the loon
I'd smile like the man in the moon

Repeat Chorus twice

All good things
