"Psicho Mutation"

Visit "[Psicho Mutation](#)" on MotoLyrics.com

When the night comes psicho mutatio begins, people
shows psychotic side and it's behavior within
Look where you walk, do it so carefully, cause you
cannot see all that there inhabit
Welcome to the night, take off the mask, show your
real face
The night can redempt a sin with ither, and I will to sin,
tonight
We live in the dark, where no one dares to go, cause
the fear feed our ancestral instinct
The psichotic side that exist in our mind wake up in the
night, when the conscious sleeps
Welcome to the night, take off the mask, show your
real face
The night can redempt a sin with other, and I will go to
sin tonight
I have this cold eyes of tomorrow trying to see a form
of life
I walk the true path of sorrow beneath this dark
supernal night
Old castles burn away in the horizon black ravens are
veiling the stars
A secret passage between unnamed graves I feel my
mind out of this world
We live in the dark, where no one dares to go, cause
the fear feed our ancestral instinct
The psichotic side that exist in our mind wake up in the
night, when the conscious sleep
Welcome to the night take off the mask, show your real
face
The night can redempt a sin with other, and I will go to
sin
Welcome to the night, take off the mask, show your
real face
The night can redempt a sin with other, and I will go to
sin, tonight.
