No mask can hide the look on my face  
My sorrows are all gone, Ive finally found my place  
I couldnt go home if I tried

Take the weight of time off my shoulders  
Sit back and embrace a new day  
Im beginning to branch off uncertainty  
I use the stars to guide my way

As I move the road unfurls  
Beckoning from deep inside  
No sign at all of the bitter tears we cried  
I couldnt go home if I tried

Take the weight of time off my shoulders  
Sit back and embrace a new day  
Im beginning to branch off uncertainty  
I use the stars to guide my way

I wanna blaze a new trail  
And find a spot where we can meet  
Well lie together with wandering eyes and the world at  
our feet  
I couldnt go home if I tried

Take the weight of time off my shoulders  
Sit back and embrace a new day  
Im beginning to branch off uncertainty  
I use the stars to guide my way
