Born and raised on desert planet  
In a galaxy far away  
Trained by a knight who was supposed  
To teach him The Way

A natural mechanic, a skillful pilot  
A hero in The Wars  
But the Senator was aware of his existence  
And plotted another course

Impatient with his teacher he chose an easy path  
Tempted by something New

The prophecy of the boy - a legend coming true  
Fascination - Alteration - Domination  
The Dark Side of The Force

Provocation - Depredation - Annexation  
The Dark Side of The Force  
Dressed in black robes, two meters tall  
Wearing a survival suit  
Rules with fear, terror and violence  
Held in a very bad reputation

Helps the Emperor locate and destroy  
The preservers of the Light  
But a Master manages to hide and find  
A pupil to keep up the fight

In the final battle, he faces his worst enemy  
- the son - and suffers a defeat

But before his final breath, the circle is complete  
Fascination - Alteration - Domination  
The Dark Side of The Force

Provocation - Depredation - Annexation  
The Dark Side of The Force
