"They Are Here"

Visit "[They Are Here](#)" on MotoLyrics.com

Aliens and governments are working together
With a secret, devastating plan

Stop fighting each other and start to behave
Or else, you should get ready to become a slave

And if you ask the authorities
Their policy is clear: "Deny everything"
There's no way you can see
If it is the enemy
Forget your liberty, 'cause
They are already here!

It could be anyone
Assimilation has begun
There's no way you can run, 'cause
They are already here!
With unknown technology and shape-shifting ability
They are disguised like the human race

They're investigating, planning, infiltrating
Preparing the invasion from outer space

Doctors, scientists, military officers
Politicians, high positions - they are everywhere

So all you nation, we've got to unite
Let's show them we are Earthlings and give them a
fight!
We'll show them what we've got
And reveal their evil plot
Let's give it one more shot, 'cause
They are already here!

Before it is too late
We've gotta change our lethal fate
There's no time to debate, 'cause
They are already here!
