"Calling America"

Visit "[Calling America](#)" on [MotoLyrics.com](#)

Somebody told her that there was a place like heaven
Across the water on a seven fourty seven -
Yeah
we're living in
in a modern world.
And pretty soon she's really got the notion
Of flying out across the big blue ocean -
Yeah
we're living in
in a modern world.
Talk is cheap on satellite
but all I get is static

Information I'm still here
redial on automatic.

Calling America - can't get a message through

Calling America - that's what she said to do

Calling America - that's where she has to be

Calling America - she left a number for me

Calling America -

But I'm just talking to a satellite
Twenty thousand miles up in the sky each night -
yeah
we're living in
in a modern world.
All I had to do was pick up the phone

I'm out in space trying to talk to someone -
Yeah
we're living in
in a modern world.
She left a number I could call

but no one's there
no one at all.

There must be something going wrong

That number just rings on and on.

Calling America - can't get a message through

...

Said she'd call when she'd been gone a while

Guess she's missing me across the miles -

Yeah

we're living in

in a modern world.

Calling America - can't get a message through

...

Calling America - calling America - calling America -

Calling America - calling America - calling America -
