What you see you do not see  
So dimensions distort reality  
A ripple in the eyes of perception  
Can lead to depth's utter deception

A pre existent thought  
From monkey then to man  
Can mislead what is taught  
Of how we first began  
A pre existent thought  
Form monkey than to man  
Can mislead what is taught  
Of how we first, how we fist began

The way that we are led to think and be  
Denies us from the path to the enlightening key  
The overwhelming need, to consume and breed  
Plays the part in our devils greed

A pre existent thought  
From monkey then to man  
Can mislead what is taught  
Of how we first began  
(Repeat)

Multiple visions of god and religion  
Creates the path of the flight of pigeons  
But caught inside the one way streets  
Restricts us from our different beats

A pre existent thought  
From monkey then to man  
Can mislead what is taught  
Of how we first began  
The preexistent notion  
From monkey then to man  
Is resistance of the motion  
Of where it all began
