When I wake up in the morning
To feel the sunshine on my face
I pray that it is not storming
But music helps me in case
Helps in out in case

I feel, just another lullaby
And I play, just another lullaby
And I sing, just another lullaby
And I dance to just another lullaby
Just another lullaby

But when the dark comes over you
Your wasted life is pointless to
And then you start to pray
For the light
Then you wait in agony
Your selfish pride is killing me
Your weak your bones could never win the fight

I said, time is wasted
Time is shared
Losing lives that never cared
Is this human soul ultimately good
Burns and lashes penetrating
Theres no time for recreating
Take your whippings like a good boy should
Like a good boy should
Like a good boy should
Take your whippings like a good boy should

I feel, just another lullaby
And I play, just another lullaby
And I sing, just another lullaby
And I dance to just another lullaby
Just another lullaby
Just another lullaby
Just another lullaby
