I can't control my anger
It burns me up inside
I won't ask your opinion
You can't make up your mind
You ask so many questions
You tell so many lies
You let the system change you
You let them rape your mind

Get back

You'll get what you ask for
No fucking lies

You know I can't be your savoir
won't even try

You think that you can deceive me?
No fucking way

High price, and you'd best believe me
you'll fucking pay

I hide behind the shadows
I hide behind your eyes
I break down your defences
and I won't be denied
You ask me for forgiveness
I only give you pain
And I will dig my fingers
Deeper into your brain

Get back

You'll get what you ask for
No fucking lies

You know I can't be your savoir
won't even try

You think that you can deceive me?

No fucking way

High price, and you'd best believe me
you'll fucking pay

When I'm here on my own
now its time that I let you know
that I feel so much stronger now
than I have before

When I'm here on my own
now its time that I let you know
that I feel so much stronger now
than I have before

There is no wrong or right
I only take what's mine
you'll never change my mind
don't even try

When I'm here on my own
now its time that I let you know
that I feel so much stronger now
than I have before

And I'm here on my own
now its time that I let you know
that I feel so much stronger now
than I have before
