Get out while you can  
It's on me  
Get out while you can  
Let it be  
You have always been here with me  
And I have always been here with you

Get out while you can  
It's on me  
Get out while you can  
Let it be  
You have always been here with me  
And I have always been here with you

I have always been here with you  
You have always been here with me

Get out while you can  
Get out while you  
Get out while you can  
Get out while you  
Get out while you can  
Get out while you  
Get out while you can
