"A Place In Displacement"

Visit "[A Place In Displacement](#)" on MotoLyrics.com

Wanna hold a vision of tomorrow

Understand the truth from the lie

Wanted love and craving some attention

Where was I when you lost your sight

You wear your heart on your sleeve

The weatherÃ,â€¦

One day through the next we'll see

You might not remember me

Memories dissolve with years

Age can take the best I fear

One day through the next we'll see

You might not remember me

Memories dissolve with years

Seems that isolation brings us near

Gotta find my place in displacement

I'll defy the truth for a lie

Capture all the vistas of your own life

Face to face alone at the time

So wear your hearts on your sleeve

The weatherÃ,â€¦

One day through the next we'll see

You might not remember me
Memories dissolve with years
Age can take the best I fear
One day through the next we'll see
You might not remember me
Memories dissolve with years
Seems that isolation brings us near
One day through the next we'll see
You might not remember me
Memories dissolve with years
Age can take the best I fear
One day through the next we'll see
You might not remember me
Memories dissolve with years
Seems that isolation brings us near
