Everybody come listen up now  
Gotta let you know what life is all about  
Never be afraid let your feelings show

Nothin's wrong when you keep dreaming on  
But you gotta let your heart and mind be one  
Hold your head up high don't be insecure

Refrain:

Hold on to your dreams, don't throw it away  
Never let go of it come what may

Chorus:

Together we will fly  
We'll never say goodbye  
To dreams that lead us to  
A better me and you

The future looks so bright  
If we just hold on tight  
Tomorrow we will sing  
The best that we can be
